

TECHNICAL DATA

Product Name: **System X Interior Protector**

Substance key: SXINTERIOR

Ambient cure hydrophobic protection for leather, vinyl, carpet and fabric.

Product Overview

System X Interior Coating is a ready to use ambient drying protectant for leather, vinyl, fabric and carpet surfaces. System X Interior is applied easily by hand sprayer. This coating's cross-linking mechanism produces a highly hydrophobic barrier that becomes the functional surface of the substrate treated. Application time of about 1 minute per square meter and dry time of approximately 30 minutes depending on temperature and humidity levels.

This product has excellent hydrophobic and stain resistance.

Major Applications

- ✓ Automotive, marine, and aircraft carpet / fabric / seats
- ✓ Furniture
- ✓ Automotive, marine, and aircraft leather / vinyl / dashboards
- ✓ Leather apparel

Technical Data

Appearance	Clear
Finish	Invisible
Chemical resistance	Good
Coverage	40ml-80ml per sq meter, depending on material
Dry time	30 minutes
Shelf life	1-2 years from shipment date when unopened and stored dry at 18°C (64°F) to 23°C (73°F)
Protection effectiveness	5 years depending on environmental factors
